We keep today's hotel guests **plugged in**

(800) 709-8731

www.directvideotv.com

sales@directvideotv.com

Although the MediaHub HD works with all hospitality TVs, we are proud to be integration partners with these manufacturers:

Keeping Your World Connected™, MediaHub™, MediaHub HD™, MediaHub Extender™, PowerHub™, and ConnectKit™ are trademarks of TeleAdapt, Inc. iPod® and iPhone® are registered trademarks of Apple Inc., registered in the U.S. and other countries. BlackBerry® is a registered trademark of Research In Motion, LTD. Bluetooth® is a registered trademark of Bluetooth SIG. All other trademarks acknowledged.

A leader in connectivity solutions...
for the hospitality industry

Today's guests check-in with all their personal electronics and they want to use them. They want to watch their own TV shows and movies, play their own games, and listen to their own music selections through the in-room TV. They want easy-to-find and easy-to-use methods for connecting to the Internet, as well as fast and convenient ways to recharge all those electronics.

Your guest are looking to you to **...plug them in.**

For more than 18 years the hotel industry has turned to TeleAdapt for coming trends in guest technology. We can provide the solutions you're looking for.

Today's hotel guests want to plug in **...be the hotel that lets them.**

Table of Contents

- 1 | **MediaHub HD™**
Connectivity panel with Stereo Bluetooth wireless technology.
- 3 | **MediaHub Standard™**
Connectivity panel compatible with channel-mapping.
- 4 | **Mounting the MediaHub**
Mounting the MediaHub with a flatcreen TV.
- 5 | **MediaHub Extender™ & PowerHub™**
Connectivity panel featuring power and data.
- 6 | **Power Connectivity**
Add the convenience of more power in the guestroom.
- 7 | **iPod/iPhone & AudioHub™ Connectivity**
Products that free your guests from headphones in their hotel room.
- 11 | **Wireless Internet DeskHubs™**
Solutions for turning existing Ethernet jacks into a wireless signal for your guests.
- 13 | **Wired Internet DeskHubs**
Put an Internet connection point at your guest's fingertips.
- 15 | **The Pull-Through Series**
Complete cable management solutions.
- 17 | **Hotel Retail Products**
Easy-to-sell accessories for guests.
- 19 | **DeskCards™**
Sturdy acrylic DeskCards are included with most products, or purchase them separately.

Guests check in with all their **electronic devices...**

...and they want to use them with the in-room TV

MediaHub HD™ | TA-7650 | with Bluetooth® & Auto-Sensing

The MediaHub HD lets guests connect devices such as laptops, MP3 players, iPods®, iPhones®, iPads®, and game consoles to the in-room TV, allowing them to play their own movies, music and games on the big screen. It's also the first and only intelligent entertainment panel to feature Stereo Bluetooth wireless technology for the hotel industry. With it, guests can stream their audio from anywhere in the hotel room through the TV sound system.

A single HDMI cable connection to the TV makes installation simple and less costly.

Connection Ports for the Guest

- A** Composite Audio/Video: Plug in an iPod, MP3 player, DVD player, game console, or digital camera
- B** S-Video: Super Video enabled video cameras and laptops
- C** Mini Stereo Jack: Any device with a headphone jack
- D** VGA (RGB): Laptop computer
- E** HDMI: High definition video from laptops, MacBooks, or HD camcorders
- F** USB (5v) Power: Charge electronic devices
- G** Stereo Bluetooth: Stream audio wirelessly

Stereo Bluetooth lets guests listen to their music through the in-room TV speakers ...wirelessly

*The MediaHub HD is the **only** panel that lets guests keep their iPhone, iPod, iPad, BlackBerry® and other Stereo Bluetooth enabled media players with them, streaming audio wirelessly from anywhere in the room. Hotel Sorella in Houston, Texas, USA (featured above) is just one of many fine hotels to provide wireless music streaming for their guests through the MediaHub HD.*

- Single HDMI back-end cable makes installation easier
- Built-in auto-sensing and auto-detect instantly recognizes the device being used and switches the TV to that device
- Guests can fill the room with their own music playlist without tying their device to the TV
- LED buttons allow guests to switch between multiple devices
- Compatible with any TV with an available HDMI port
- Available in a variety of mounting options

Looking for a more cost-effective option **for plugging your guests in?**

The MediaHub Standard also lets guests enjoy their movies and programs on the big-screen TV, and their music through the sound system, just by plugging in their devices.

MediaHub Standard™ | TA-7600 | Passive Connectivity

- Same wired ports as the MediaHub HD so guests can connect their electronics to the in-room TV
- Helps prevent guests from tampering with in-room TV
- Compatible with channel mapping
- Guests use the TV remote to select the input channel their device is using
- Available in a variety of trims to fit any decor
- Provide easy-to-follow guest user instructions with acrylic DeskCards

Our space-saving, acrylic DeskCards with inserts are the perfect way to show guests what devices they can use and where to plug them in.

With MediaHub products, in-room TVs are tamper-resistant.

Install the MediaHub... **with or without a flatscreen TV**

Let us help you do it. Our mounting partners have designed elegant installation options that allow you to mount the MediaHub directly to an existing TV. Or, add a flatscreen TV with the MediaHub to any room while concealing the wiring, all without tearing out the walls.

You can even flush-mount a MediaHub product directly into a wall, or choose a desktop version. Let one of our sales representatives walk you through just how easy it is.

All the entertainment features of the MediaHub ...plus power & data

MediaHub Extender™ | MediaHub with Power & Data

- MediaHub product with power outlets and Internet jack
- Available in a variety of trims to fit any decor
- Install as one unit or two separate panels
- Choose from a variety of international outlets
- Order with two different but compatible power outlets

MediaHub HD Extender TA-7750 | MediaHub Standard Extender TA-7700

PowerHub™ | TA-7500 | Power & Data

Purchase the PowerHub as a stand alone product as well.

- Provide your guests with extra power outlets
- Choose from a variety of international outlets
- Provide a convenient Internet connection point
- RJ45 port can be blanked out to make it power only
- Universal sockets available in some markets

Looking for a compact, single solution that can CHARGE more than...

2000 guest devices

ChargeHub™ | TA-9500

Today's travellers don't go anywhere without their cell phones and other devices. With ChargeHub, when guests forget their chargers you'll have the perfect solution.

The 12 connectors, together with the industry standard USB socket, makes ChargeHub compatible with more than 2000 devices including iPod, iPhone, Blackberry, Nokia, Sony Ericsson, and many others. Ideal for the concierge/reception desk, business centers and in-room installation.

Why are we the leader in iPod/iPhone solutions for the hospitality industry?

...because we've always been the leader in identifying what **today's traveller is looking for in their hotel stay**

One of today's trends is the need for **iPod/iPhone connectivity**. More and more hotel guests are bringing their own entertainment with them, downloaded onto an iPod or iPhone, and research shows those numbers will continue to grow.

Hotels that want to stay competitive are providing a way for those guests, and their kids, to plug in.

We offer a complete line of iPod/iPhone docking stations, and audio and AV hubs that let guests play music and videos through the in-room TV or sound system. We even offer solutions that let guests stream their music wirelessly. Some products also work with laptops or MP3 players.

With solutions to fit any budget, **you can't afford not to plug your guests in.**

We offer a variety of easy-to-use iPod/iPhone docking stations.

iPod/iPhone radio alarm clock for hotels...

Enhance your guests stay even more with this innovative clock radio alarm and audio system for iPod/iPhone.

Guests can wake to their own custom playlists, or simply use the AM/FM radio. Every iHome includes a remote control, making it more convenient for your guests to use.

Sleekly styled, available in gun metal grey or white.

...guests wake to the sound of their own music

iHome
Live Life Loud™

iP9 | iHome Hotel Mode Dual Alarm Clock Radio

- Wake to iPhone/iPod playlists, FM radio or buzzer
- Plays and charges iPhone and docking iPod models
- Bass, Treble, 3D and Balance controls
- Reson8® ported cabinet stereo speakers
- Remote control and iPhone/iPod menus
- Adjustable snooze, easy-to-use interface
- Output: 6 watts total power output
- Adjustable iPhone/iPod dock
- Hotel mode switch for single day alarm
- Hotel mode hi/low volume selection

Affordable **solutions...**

...that free your guests from their headphones

- Elegant, sleek, low-profile style
- Plug-and-play installation
- Cables are included
- Guests can fill the room with their own music playlists, or view their movies and TV programs on the in-room TV
- Caps can be custom branded with your hotel logo
- Pull-Through products offer a choice of base and cap color
- Each product comes with an attractive acrylic DeskCard™, which can also be branded

TA-7100 | AudioSpool™

Features a 1.8m (6 ft) retractable audio jack cable. Guest can access their own music by pulling the cable out to connect it to their laptop, MP3 player, iPod® or iPhone®. The cable retracts back in place when done.

TA-7300-01K | AV Pull-Through™

Features an iPod/iPhone 30-pin dock connector. Connects easily to the TV's composite Audio/Video jacks, allowing guests with iPods or iPhones to enjoy their music, videos and movies through the in-room TV.

TA-7300K | Audio Pull-Through™

Holds an audio jack cable securely in place on a table or desktop. Guests can connect any personal audio device, such as an iPod, laptop, or MP3 player, quickly and easily.

Every audio product comes with a sturdy acrylic DeskCard. Use DeskCard inserts to provide your guests with easy-to-follow user instructions.

Wi-Fi Internet for your guests...

without renovation or new cable runs

TeleAdapt DeskHub products are a quick and affordable way to provide wireless Internet access for Wi-Fi enabled guests.

- Avoid costly and disruptive cable runs
- Plug-and-play installation
- 100% wireless coverage
- Eliminate existing dead spots
- Also provides a wired access point for non Wi-Fi guests
- Built-in management feature allows remote configuration over the network
- Some products can convert an existing wireless signal to an Ethernet cable
- The perfect solution for large and small properties

If you're wired for high-speed Internet **you can also provide wireless**

TA-6900 | DeskPoint™

Provides wireless access throughout the guestroom just by plugging it into an existing Ethernet socket. A 1.8m (6 ft) retractable Thinline cable for non Wi-Fi guests, or guests who simply prefer to plug in. Customize with your property's logo.

TA-7900 | DeskPoint RJ45

Provides wireless access throughout the guestroom just by plugging it into an existing Ethernet socket. An Ethernet connection socket for non Wi-Fi guests, or guests who simply prefer to plug in. Customize this product with your logo as well.

TA-8000 | Under Desk

For a more hidden option, this compact model mounts under the desk, providing wireless access throughout the room, and an Ethernet connection socket.

TA-6410 | DeskBridge G

Provides a wired connection point for wireless networks by converting the wireless signal to an Ethernet cable. A retractable 0.8m (2.5 ft) slimline cable, provides Internet access for laptops without Wi-Fi technology.

TA-6450 | TravelBridge G

For guests without wireless, give them this attractive soft-case kit containing the TravelBridge G. Converts the wireless signal to an Ethernet cable, providing a wired port for their laptop. Or, mount it permanently in the room under a desk or tabletop.

Attractive and easy-to-find **Internet access points**...

TA-7300 | Pull-Through Pro™

A stylish compact solution to in-room cable management that's weighted to stay in place. Silk-screen with your property's logo.

TA-6300 | Pull-Through Access Point™

A low-cost in-room cable placement with a unique clam shell design. Slides cable easily while keeping the unit in place. Customize front label with your property's logo.

TA-6100 | MiniAccess Point™

Now you can quickly relocate the Ethernet plug-in socket from the wall to the desktop, making the Internet access point easy to find for your guests.

...pull-through **or retractable**

TA-6000 | DeskSpool™

An instantly recognizable Internet connection point features a retractable 0.8 m (2 ft) slimline Ethernet cable, which retracts back when not in use.

TA-7000 | DeskSpool Pro™

Unique, stylish design offers the same great features as the DeskSpool, but with a longer retractable 1.8 m (6 ft) slimline Ethernet cable. Heavily weighted for product stability.

Your guests shouldn't be on their hands and knees looking for an Internet connection. Put it right at their fingertips.

- Attractive, low-profile
- Affordable and reliable
- Quality Internet cable included
- Brand with your logo
- Includes acrylic DeskCard

TA-6200 | PowerSpool™

Offer an instantly recognizable Internet connection point and provide a convenient power outlet, right at your guest's fingertips.

TA-6500 | ConferenceHub™

Eliminate clutter with this multi-connection networking hub. Perfect for meeting or conference rooms. Up to four computers can access one local network (LAN)/Internet connection, or, daisy-chain up to four hubs together to provide 16 connection points. Easy installation and high performance.

Cable holders **never looked so good... or performed so well**

- Customize the product with your property's logo
- Cable included with each product
- Choice of base and cap color
- Locking cap for added security
- Includes sturdy acrylic DeskCard

CableSitter™ | Universal Cable Holder

Audio Pull-Through™ | Audio Jack Cable Holder

Pull-Through Pro™ | Internet Cable Holder

AV Pull-Through™ | iPod Cable Holder

Looking for a clean, compact and stylish way to keep your cables organized and accessible? The CableSitter will hold virtually any cable securely in place such as a printer or Internet cable. Eliminate the clutter.

Nothing could be easier. Guests connect their laptop, iPod, or MP3 player to the pull-through audio jack and begin playing their personal audio selections through the in-room TV or sound system.

A stylish compact solution to providing your guests with an easy-to-find Internet connection point. The Pull-Through Pro is weighted so it stays in place when the cable is pulled. Each unit comes with a 1.8 m (6 ft) CAT5 Ethernet cable.

Today's guests not only check in with their own music, but their own movies, videos and even TV programs loaded right onto their iPod or iPhone. The AV Pull-Through is a sleek, very affordable solution that allows guests to play their iPod or iPhone content through the in-room TV.

Offer your guests the accessories they need...

...and generate the revenue **you want**

We offer a complete line of guest products, which can be sold through the minibar or concierge.

- Cables to connect guest's electronics to the in-room TV individually packaged, or in kits
- Brand packaging with your logo
- Unprepared guests can take full advantage of the technology you've provided

ConnectKit™

The ConnectKit comes in two assortments to choose from. You can also customize a kit with your choice of cables.

The kit is available in an attractive leather or high gloss box, or a soft nylon zip bag. They both include a cable identification card with easy instructions for your guests.

VGA Male to Male with Phono Cable

Connects your guest's laptop or video to the in-room TV.

Retractable USB to Mini USB Cable

Your guests can charge their Blackberry and other USB powered devices.

Audio/Video Kit

Guests can play their own music, videos and games from an iPod, MP3 player or game console through the in-room TV.

iPod Composite Video & USB*

Lets guests play music and videos from their iPod/iPhone through the in-room TV.

* Cable may vary slightly depending on region.
